TECHNICAL RIDER

last update : 29 October 2026

NOTE: This technical rider lists the equipment required if the performance is carried out exclusively with the company's own material. The lighting equipment specified in the footer of the corresponding lighting plot must be taken into account.

LIGHT EQUIPMENT

- 4 RGBW Zoom LED Par spotlights.
- 4 WW vertical LED strips.
- 1 12m RGBW neon LED strip.
- 2 20m WW COB LED strips.
- DMX decoders for 24V LED strips.
- Dimmer for 230V LED strips.
- 1 'phantom' power supply for 230V LED strips.
- 1 DMX splitter.
- 230V cabling and DMX cabling.

LIGHT NOTES

- The lighting equipment mentioned is the responsibility of the companies.
- If there is no grid on which to mount the projectors (see lighting plan), four tripods 3 metres high will be used.
- The lighting is operated via a PC using MA2 software with Comand Wing.

AUDIO EQUIPMENT

- PA system set up on stage, preferably with four speakers positioned around the set, suited to the venue.
- Mixing desk.

AUDIO NOTES

- The sound system is operated via a PC using dedicated software.
- The control desk is set up on stage.
